

Snowflake Christmas Ornament

Anc Tap Anchor Metallic

Tapestry Wool
 Bright White 8000
 Cathedral Blue vy dk 8792

Backstitch in:
 Tapestry Wool
 Bright White 8000
 Metallic
 Pearl 304

This design is stitched on a five point plastic star by Darice.
 Plastic canvas is rigid and doesn't fray and so is ideal for hanging.

The chart shows a single panel. The plastic canvas stars have panels which are more diamond shaped than shown. There are five panels with thicker lines in between which we have names 'spines' to distinguish them.

Each of the five 6 x 6 panels are cross stitched in tapestry wool following the chart. The backstitch in white wool and Anchor Metallic is then added.

The spines are cross stitched in white tapestry wool combined with Pearl Metallic.

When the cross stitch is complete, the star can be backed with fabric e.g. felt. Using a sharp needle work satin stitch around the edges, through the holes in the plastic canvas and through the fabric. Two stitches per hole should cover the edges.

Add ribbon or cord through one point of the star and your ornament is ready to hang on your Christmas tree.
